Synopsis:

Garret Weir has just turned seventeen. For any normal teen this would be quite the milestone. But for Garret it's even more amazing he's made it to this age, because in Garret's life the human population of the Earth is gone, changed and turned into flesh hungry zombies, or "necs", as he calls them. In the world he was born into, except for his parents that have kept him safe in a small compound hidden in the mountains of southern Oregon, Garret has never known another living soul. However, he is not the only seventeen year old in the family. Just the only one alive...

*Little Dead Man* is a 102,000 word novel set decades after the zombie apocalypse and tells the story of conjoined twins Garret and Garth Weir. Garret is alive and Garth is undead, has been since birth, leaving him the size of an infant and attached to Garth's spine. And he won't leave his brother in peace. This novel is fast-paced, high-action and doesn't pull any punches as Garret must struggle with a mother that is mentally unstable, a missing father that has kept too many secrets and the fact that the world he had always been told was completely dead, actually has well-developed human survivor pockets. And not all of those are friendly.
